

Eric's tips for tenants

How can I make my home more safe and secure?

-  Make sure your doors are locked when you leave your home.
-  Always keep your keys in a safe place. Never leave them on view or anywhere they may be found by anyone else.
-  Always check the identity of callers before you let them in. All official representatives should have an identity card. Ask to see it!
-  If you live in a block of flats with a phone entry system, make sure you close the main door behind you.
-  Get together with your neighbours to form a local Neighbourhood Watch Scheme.
-  Remember to consider security for garden sheds and garages.

For further information on home safety and security, contact your local Crime Prevention Officer.
